

## TECHNICAL DATASHEET

PRODUCT NAME Proteinase K			
ChIP grade reagent Separately available			
Cat. No: kch-507-100	<b>Size:</b> 100 μl	Concentration: 100 x stock solution	Lot #: D004
Cat. No: kch-507-250	<b>Size:</b> 250 μl	<b>Concentration:</b> 100 x stock solution	Lot #: D004

Description: Proteinase K is a non-specific serine protease. This ChIP grade product has been extensively validated to isolate the DNA from the Immunoprecipitated (IP'd) chromatin. It is included in our OneDay ChIP KIT (cat# kch-onedIP-060, -180) and our LowCell# ChIP KIT (cat# kch-maglow-016). It is now separately available.

For more details about these kits, see instruction manual on our web site (www.diagenode.com).

Format: Supplied as a 100 x stock solution.

Storage: The product is stable for at least 2 years when stored at -20°C. Avoid multiple freeze-thaw cycles.

**Precautions:** This product is for research use only. Not for use in diagnostic or therapeutic procedures.
